

March 24, 2021

Dear Parents and Guardians,

Yesterday, March 23, 2021, the district was notified of a Discovery Academy student, a High School student, a Mars Elementary student, and a Middle School staff member who has been identified as a confirmed case with the COVID virus. Berrien County Health Department and Berrien Springs Public Schools have completed the contact tracing process. As a result of the contact tracing for the Discovery Academy student, two students at Mars Elementary and one student at the Middle School will be required to quarantine. For the High School student case, four students at the High School will be required to quarantine. For the Mars Elementary student case, six students at Mars Elementary, two students at Sylvester Elementary, and two students at the Middle School will be required. For the Middle School staff member, three Middle School staff members, nineteen students at the Middle School, and two High School students will be required to quarantine. There is no evidence of transmission of the virus at any of our school buildings.

The coordination and communication between our school district and the Berrien County Health Department is an ongoing testimony to the significant amount of planning and preparation our staff and BCHD staff have continued to invest in response to COVID-19 within our school district. We will continue to work closely with the health department to provide them with accurate information needed to assist in future COVID-19 case investigations and the contact tracing process. The school district appreciates the collaborative support and guidance from our county health department.

The district continues to implement the safety protocols and procedural guidelines recommended by the Michigan Department of Health & Human Services, the Berrien County Health Department and the Berrien Springs Return to School Roadmap. A copy of our district's Roadmap is available on the school district's website at www.homeoftheshamrocks.org.

Our school district will continue to follow all recommended and necessary precautions to prevent the spread of COVID-19 at all times. Please be reminded of the importance of remaining vigilant in practicing the following safety protocols to mitigate the spread of all illness:

- Wearing a facial covering
- Practicing frequent hand washing
- Remaining home when sick
- Parents are reminded to screen students daily for potential symptoms of illness before sending them to school
- Staff are reminded to complete the daily health screener before reporting to school

Thank you for your ongoing efforts to support healthy practices at home and in your personal activities as we respond to these events in our school district and community. I continue to be very proud of the way our staff and students demonstrate flexibility and cooperation during this very challenging time.

Sincerely,

David Eichberg, Superintendent
